

DUAL DEFENCE BARRIER

Ready to use lactic acid, chlorhexidine and peppermint oil based skin conditioning barrier teat dip for long acting performance between milkings

Product benefits:

- The unique combination of chlorhexidine and lactic acid in a barrier base provides long acting teat disinfection.
- High levels of lactic acid to promote healthy skin regeneration leaving teats feeling silky and smooth.
- Highly visible to ensure correct application and teat coverage.
- Efficacy tested to EN1656:2010.

Ordering information:

- 6241 – 25 litres (2,500 cows)
- 6242 – 200 litres (20,000 cows)

Shelf life:

- 1 year from date of manufacture

Storage instructions:

Store between 0°C to 25°C.
Keep out of direct sunlight.

Post-milking use:

1. Immediately after cluster removal, apply product to teats by dipping.
2. Ensure that teats are fully covered and that product is liberally applied.

This product cannot be used through a teat sprayer.
