

UDDERSHIELD BARRIER

Ready-to-use iodine and lactic acid based post milking low drip barrier teat dip with high levels of emollients to help protect teats between milking.

PRODUCT BENEFITS:

- Outstanding performance from the combination of iodine and lactic acid
- Active barrier film protects teats between milking – helps to combat challenges from the environment
- Efficacy tested to EN1656:2009

INSTRUCTIONS FOR USE:

Post-milking use:

1. Immediately after cluster removal, apply product to teats by dipping or spraying.
2. Ensure that teats are fully covered and that product is liberally applied.
3. Refill the dip cup as necessary.
4. Dip cups should be emptied after use and washed before re-use.
5. Do not pour unused product back into container.

SHELF LIFE:

2 years from date of manufacture.

STORAGE:

Store between 0°C to 25°C.

Keep out of direct sunlight.

For health and safety information, please refer to the Safety Data Sheet.
